

First Year Seminar Online Library Component Outcomes & Context

The Online Library Component is designed to introduce students to college-level research and Belk Library resources and services.

<p>Module 1: Introduction to Research</p> <ol style="list-style-type: none"> 1. Understanding the Assignment 2. Scholarly and Popular Sources 3. Primary and Secondary Sources 	<p>Module 2: Choose a Research Topic and Explore Background Research</p> <ol style="list-style-type: none"> 1. Choose a Topic 2. Locate Background Research
<p>Learning Outcomes - Students will</p> <ul style="list-style-type: none"> • Demonstrate assignment completion and support-seeking strategies and • Use multiple types of information sources used to investigate a research topic 	<p>Learning Outcome - Students will</p> <ul style="list-style-type: none"> • Identify strategies and explore background information sources to establish a research topic
<p>Information Creation as a Process - Information in any format is produced to convey a message and is shared via a selected delivery method. The iterative processes of researching, creating, revising, and disseminating information vary, and the resulting product reflects these differences. (Read more.)</p> <p>Consider the following contextual approaches for your students:</p> <ul style="list-style-type: none"> • How might information be perceived differently based on the format in which it is packaged? • How might different source types meet the needs of assignment criteria or an information need? • How would you identify that various methods of information dissemination with different purposes are available? 	<p>Research as Inquiry - Understanding that research is iterative and nonlinear depends upon asking increasingly complex questions whose answers develop new questions or lines of inquiry in any field. (Read more.)</p> <p>Consider the following contextual approaches for students:</p> <ul style="list-style-type: none"> • What do you already know about the topic, and what do you need to explore further? • What is the dialogue or debate surrounding your topic? • Think about the ideal source. Who might produce this information? • Has your research taken you down an unexpected path? Should you modify your focus/approach?

<p style="text-align: center;">Module 3: Doing Research and Finding Sources</p> <ol style="list-style-type: none"> 1. Developing Keywords 2. Searching the Web 3. Searching the Library 	<p style="text-align: center;">Module 4: The Value of Information</p> <ol style="list-style-type: none"> 1. Evaluating Sources 2. An Introduction to Citation and Plagiarism
<p>Learning Outcome - Students will</p> <ul style="list-style-type: none"> ● Identify search strategies in order to locate information sources 	<p>Learning Outcomes - Students will</p> <ul style="list-style-type: none"> ● Apply criteria for authority and other evaluation criteria in order to determine the credibility of sources ● Recognize general attribution and citation fundamentals in order to give credit to and/or acknowledge the original ideas of others
<p>Searching as Strategic Exploration - Information searching is nonlinear and iterative. The act of searching begins with a question and directs the act of finding needed information. (Read more.)</p> <p>Consider the following contextual approaches for students:</p> <ul style="list-style-type: none"> ● What questions are you asking to direct your information search? ● What is the scope of your research? ● Who might produce this information? (i.e. scholars, organizations, academic institutions, governments) ● How do the deep and open webs organize and display their information? How might this affect what you can access? ● How can you use different types of searching language (e.g., controlled vocabulary, keywords, natural language) appropriately to find information? 	<p>Authority is Constructed and Contextual - Constructed Authority: various communities recognize different types of authority. Contextual Authority: the information needed may help determine the level of authority required. (Read more.)</p> <p>Consider the following contextual approaches for students:</p> <ul style="list-style-type: none"> ● How do you determine the credibility of a source? ● What makes a source authoritative? ● What point of view might be missing? ● Whose voice does the information represent? <p>Information has Value - Information possesses several dimensions of value, including as a commodity, as a means of education, as a means to influence, and as a means of negotiating and understanding the world. (Read more.)</p> <p>Consider the following contextual approaches for students:</p> <ul style="list-style-type: none"> ● What is the purpose of this information? ● How do you respect the original ideas and work of others?
